### CHEMICAL TESTING When the DUI offender has left the State for medical treatment (625 ILCS 5/11-501.1)

For purposes of this Section, an Illinois law enforcement officer of this State who is investigating the person for any offense defined in Section 11-501 may travel into an adjoining state, where the person has been transported for medical care, to complete an investigation and to request that the person submit to the test or tests set forth in this Section. The requirements of this Section that the person be arrested are inapplicable, but the officer shall issue the person a Uniform Traffic Ticket for an offense as defined in Section 11-501 or a similar provision of a local ordinance prior to requesting that the person submit to the test or tests. The issuance of the Uniform Traffic Ticket shall not constitute an arrest, but shall be for the purpose of notifying the person that he or she is subject to the provisions of this Section and of the officer's belief of the existence of probable cause to arrest. Upon returning to this State, the officer shall file the Uniform Traffic Ticket with the Circuit Clerk of the county where the offense was committed, and shall seek the issuance of an arrest warrant or a summons for the person.

# CHEMICAL TESTING Blood/Urine taken by Hospital Emergency Room Staff (625 ILCS 5/11-501.4)

• Results shall be admissible if:

1. The chemical test was ordered in the course of rendering emergency medical treatment (not at request of officer)

2. The chemical test was done at the hospital's own lab

# **Reporting of Injured Impaired Drivers**

Illinois law requires emergency medical personnel to report to law enforcement agencies, if requested, the results of blood or urine tests performed to determine the content of alcohol and/or drugs of an individual receiving emergency medical treatment as the result of a motor vehicle crash. This law has proven to be an important tool in the fight against drunk driving.

Emergency room physicians and nurses are in a unique position to identify injured impaired drivers because of their access to hospital test results. By bringing the injured impaired driver to the attention of law enforcement, these medical professionals increase the likelihood that the driver will receive alcohol and/or drug evaluations and treatment because of legal or administrative requirements.

Under the law, the reporting of test result information does not violate physicianpatient confidentiality. In addition, no one will be held liable for civil damages or receive professional discipline for making a report.

### CHEMICAL TESTING Blood/Urine taken by Hospital Emergency Room Staff (525 ILCS 5/11-501.4)

(b) The confidentiality provisions of law pertaining to medical records and medical treatment shall not be applicable with regard to chemical tests performed upon an individual's blood, other bodily substance, or urine under the provisions of this Section in prosecutions as specified in subsection (a) of this Section. No person shall be liable for civil damages as a result of the evidentiary use of chemical testing of an individual's blood, other bodily substance, or urine test results under this Section, or as a result of that person's testimony made available under this Section.

### CHEMICAL TESTING Blood/Urine taken by Hospital Emergency Room Staff (625 ILCS 5/11-501.4)

Summary:

1. Officers <u>shall</u> request a blood draw if they have probable cause to believe DUI has occurred per statute.

2. Hospital staff are required by Illinois law to facilitate the blood draw after a request from the arresting officer is made.

3. If the Defendant actively refuses (not just unconscious), then that officer will get a search warrant with judicial authorization.

4. If an officer has a search warrant, the offender will now be facing contempt for failure to comply (in addition to the statutory DUI penalties).

# CHEMICAL TESTING Blood/Urine taken by Hospital Emergency Room Staff (625 ILCS 5/11-501.4)

Summary:

1. Hospital staff cannot be held civilly liable for assisting the police officer.

2. It is not a violation of HIPPA for the hospital staff to give toxicology information to an arresting officer.

### DUI LAWS AND CANNABIS

### DUI LAWS AND CANNABIS

# It is still unlawful to operate a motor vehicle under the influence of cannabis (medical cannabis or recreational)

- A driver may not operate a motor vehicle while impaired by the use of cannabis
- A driver must transport cannabis in an odorproof and child resistant container.
- No driver or passenger may use cannabis in a motor vehicle.

## Pharmacology of Cannabis

Delta-9 THC is what makes people high - It's the principal psychoactive component of cannabis

Active metabolite is 11-hydroxy-delta9-tetrahydrocannabinol

If someone has a high level of carboxy, he/she is a chronic user

Concentration - the amount of drug

<u>Binding Affinity aka "potency"</u>- the ability of a drug to bind to its biological target (strength of the drug)

Measured in nanomolars

The smaller the # of nanomolar, the more potent the drug is

Synthetics are extremely potent

If you want the most comprehensive testing re synthetics, send to National Medical Services Lab in Pennsylvania

## Alcohol v. Cannabis

Alcohol likes water, so it stays in the blood. THC likes fat, however, so it goes to places like the brain  $\rightarrow$  Impairment

However, this is hard because we can't really measure

Blood results can show that delta-9 THC and 11 hydroxy THC are in defendant's blood at the time of the draw

With cannabis, we can't retrograde like we can with alcohol

While blood might not show the #, defendant could still be showing symptoms

Chronic frequent users might have a high tolerance, but they can still have motor impairment

## **Physical Factors**

Pupil dilation alone is driving under the influence

Example: If police light defendant up and he starts swerving or drives into a curb and he has enlarged pupils, that's compelling

Nervous system effects of THC may result in transient elevation of heart rate

Body temperature remains normal

Suspect's legs might be shaking ("tremors") - Actively metabolizing cannabis in his body

## **Cannabis and Driving**

Studies show that cannabis intoxication affects attentiveness, vigilance, perception of time and speed, use of acquired knowledge

Marijuana causes impairment in every performance area

Marijuana and alcohol, when used together, have additive or even multiplicative effects on impairment

A great question for police to ask when questioning a suspect regarding his/her intoxication level at the time of the stop/accident is: "On a scale from 1 to 10, 1 being not intoxicated and 10 being super intoxicated, what number were you at the time of the crash?" If they answer anything but 1, they've admitted to an intoxication level.

### MEDICAL MARIJUANA AND DUI Medical Marijuana card holders have given implied Consent to do SFSTs per 625 ILCS 5/11-501.9

(a) A person who has been issued a registry identification card under the Compassionate Use of Medical Cannabis Pilot Program Act who drives or is in actual physical control of a motor vehicle upon the public highways of this State shall be deemed to have given consent to standardized field sobriety tests approved by the National Highway Traffic Safety Administration, under subsection (a-5) of Section 11-501.2 of this Code if detained by a LEO who has reasonable suspicion that the person is driving or is in actual physical control of a MV while impaired by the use of cannabis.
